**THE 2022
TECH-MED
EVENT**

The shortage on the labour market is putting pressure on healthcare

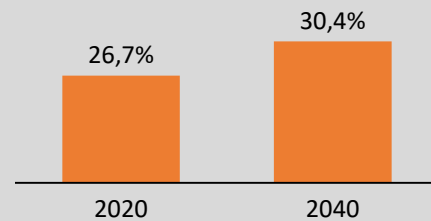

The shortage on the labour market is putting pressure on healthcare

Rising demand for healthcare...

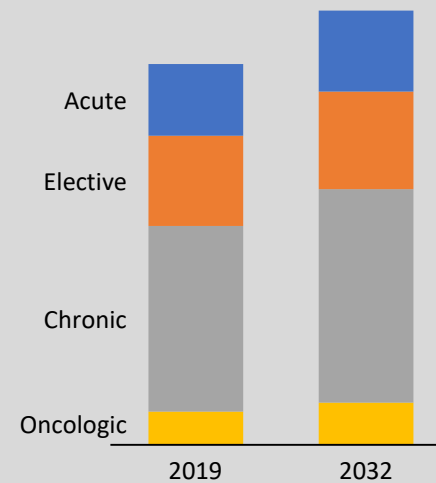

In the coming years the number elderly people in Twente will rise from **128.000** to **169.000** 65+'ers

The percentage Dutch citizens with multiple chronic conditions will rise from **26,7%** naar **30,4%**

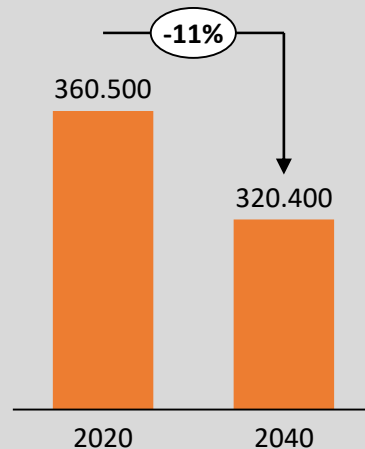

Healthcare demand in unique patients will rise in the coming years for all the primary diagnosis groups in MST set between **8%** (elective) and **27%** (oncology)⁴

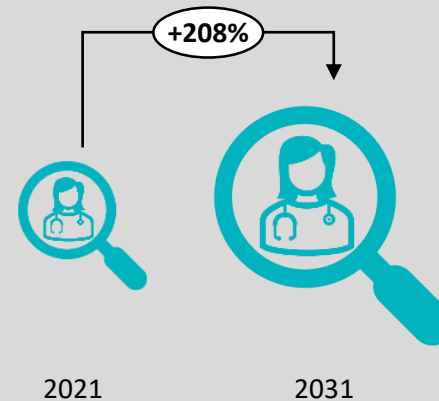

The shortage on the labour market is putting pressure on healthcare

...less available care staff

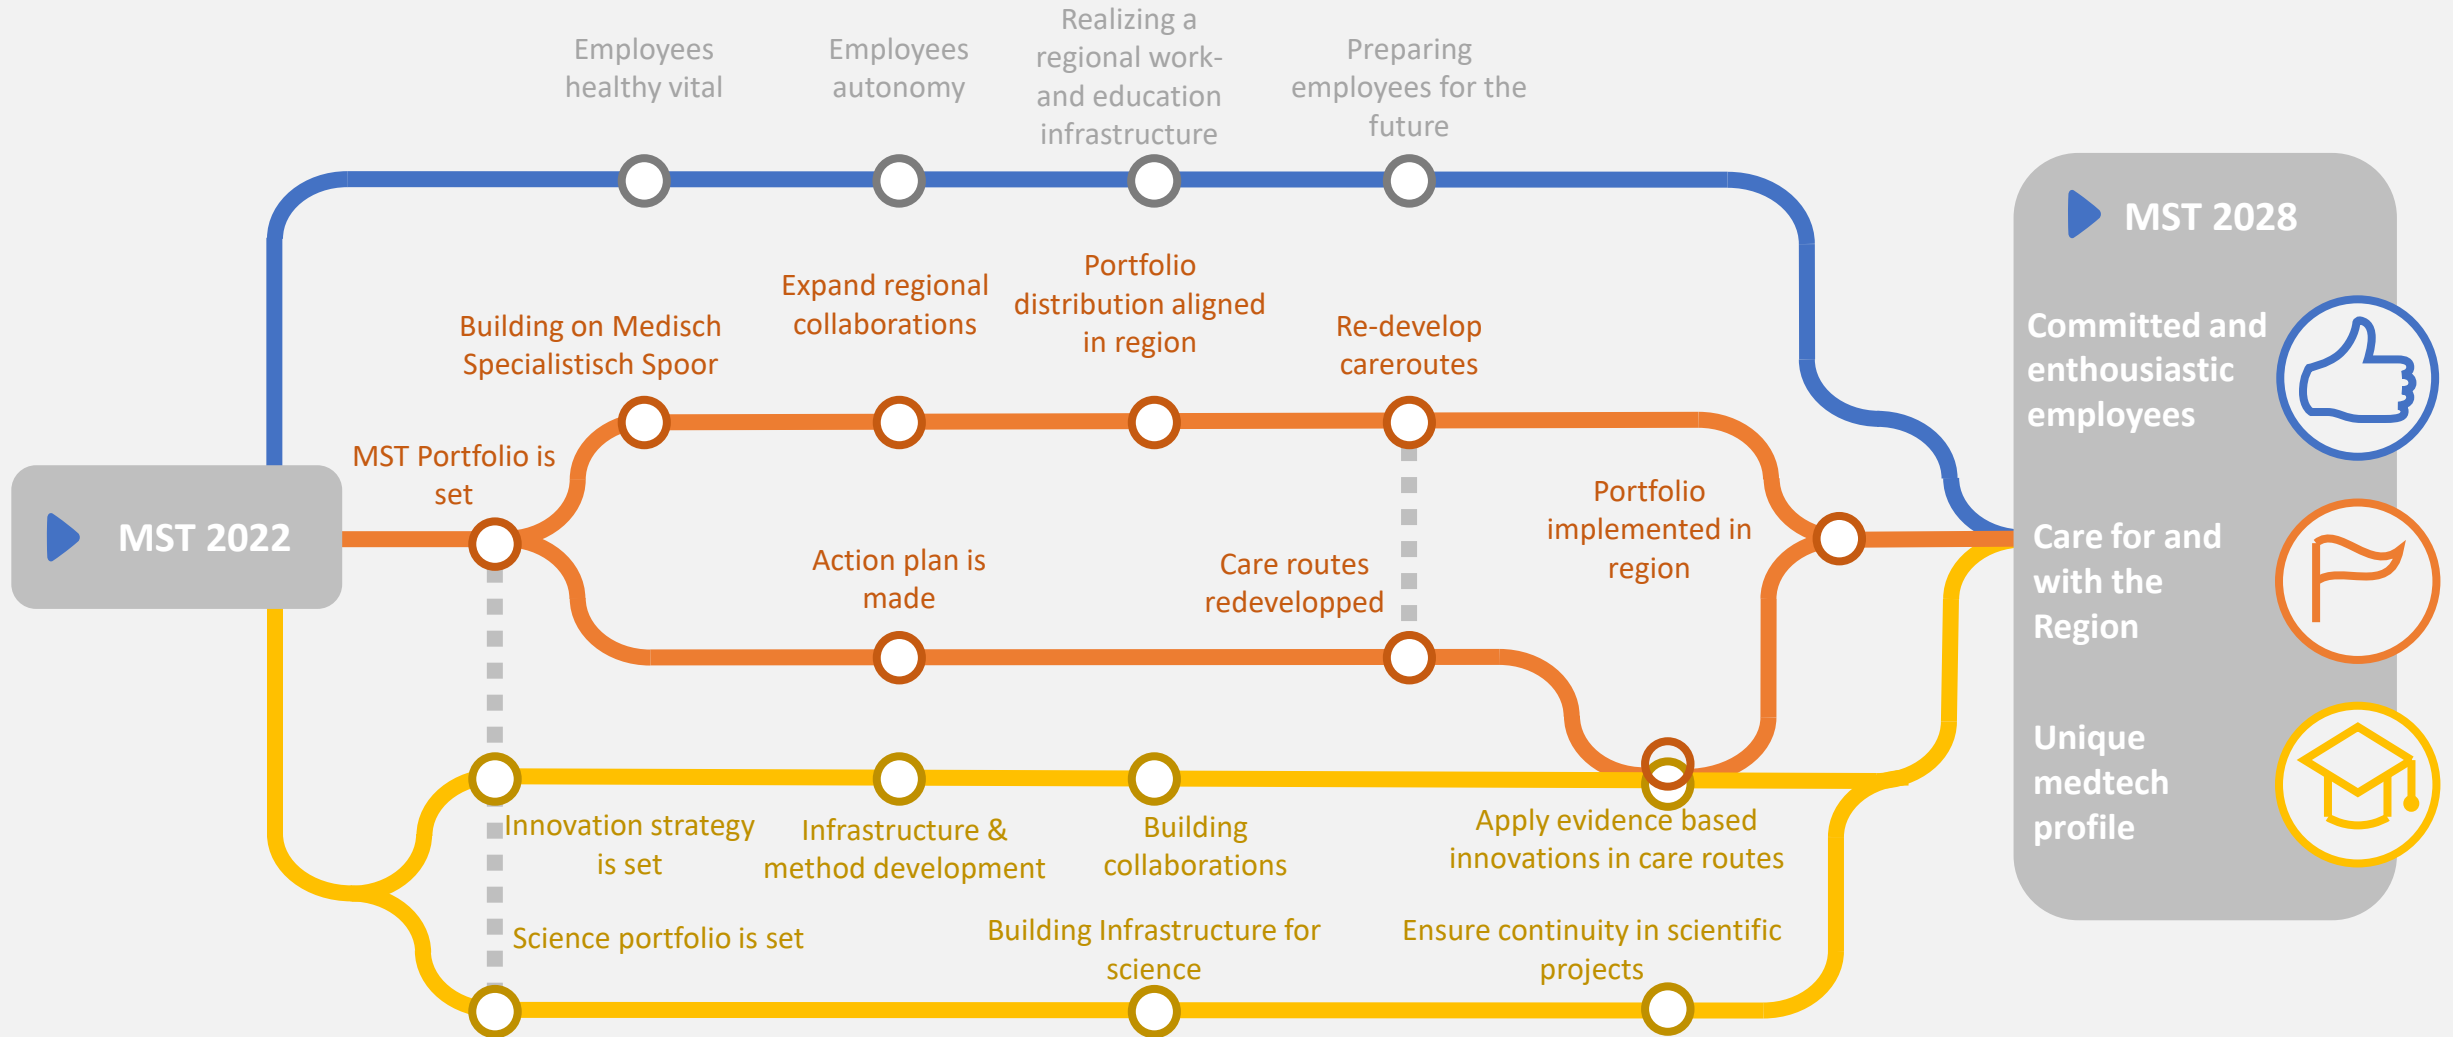

Workforce in Twente will decrease from **360.500** to **320.400** persons between ages of 20 and 65 years in 2040

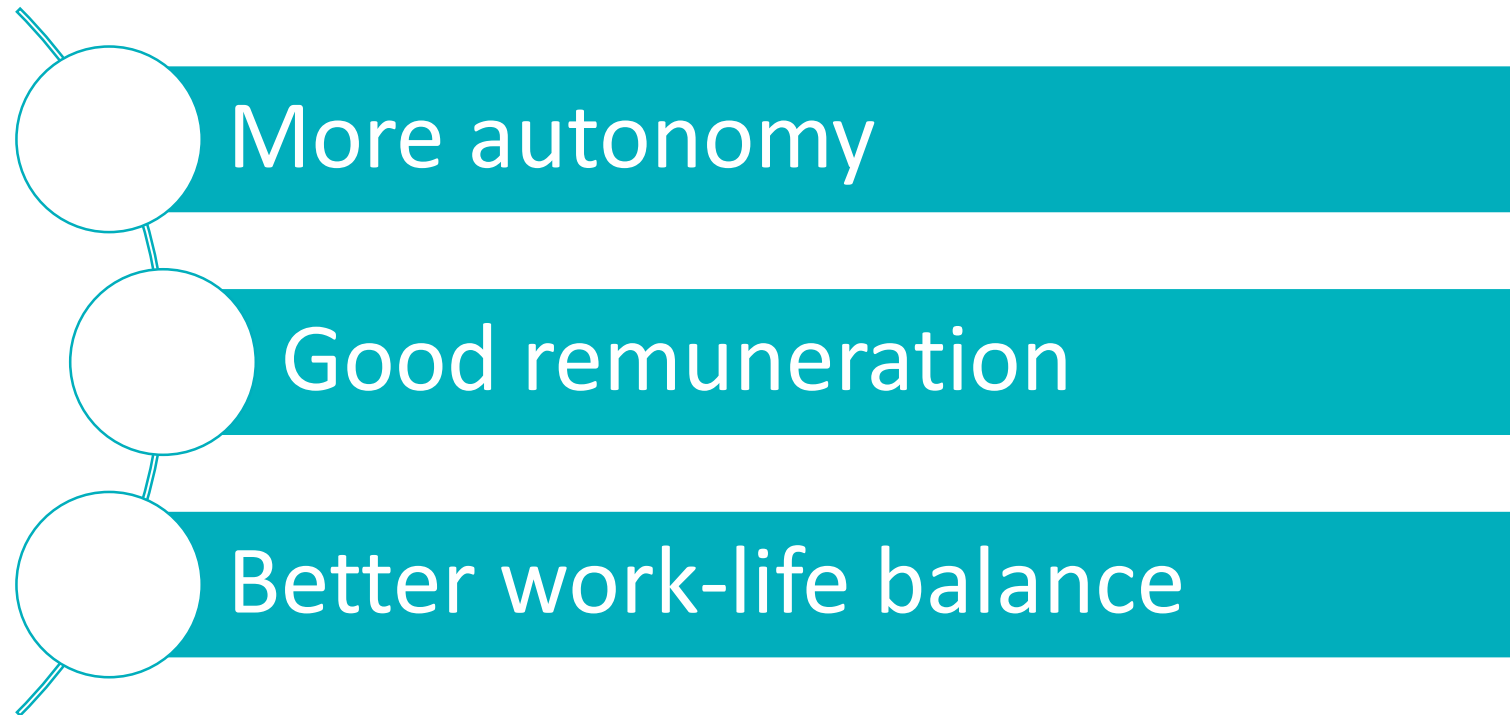

Labour market shortage in Health and Welfare will increase in Twente from **1.200** to **3.700** job openings in 2031 with an equal care delivery model

Our Strategy Roadmap

Connect employees with the purpose of healthcare

We want to be an above-average employer to retain people to healthcare

Our unique proposition is that we – together -are able to perform high tech interventions

Patients can choose their own healthcare

Focus on keeping people out of the hospital

In this area, technological innovation offers endless possibilities

Example Project Pioneers in Healthcare

E-nose

Healthcare and research organizations working together to solve one problem
