

ECMC and the Future

Anneliene Jonker
University of Twente

THE 2022
TECH-MED
EVENT

1. Expert Centre

- For all your questions on digital health development

2. One stop Living Labs

- One stop shop for fast and easy travel during product and service development
- Covering prototype development, safe testing, small scale testing and large scale implementation

3. A vivid ecosystem

- Mixing with academia, education, SMEs, health care specialists and patient representation

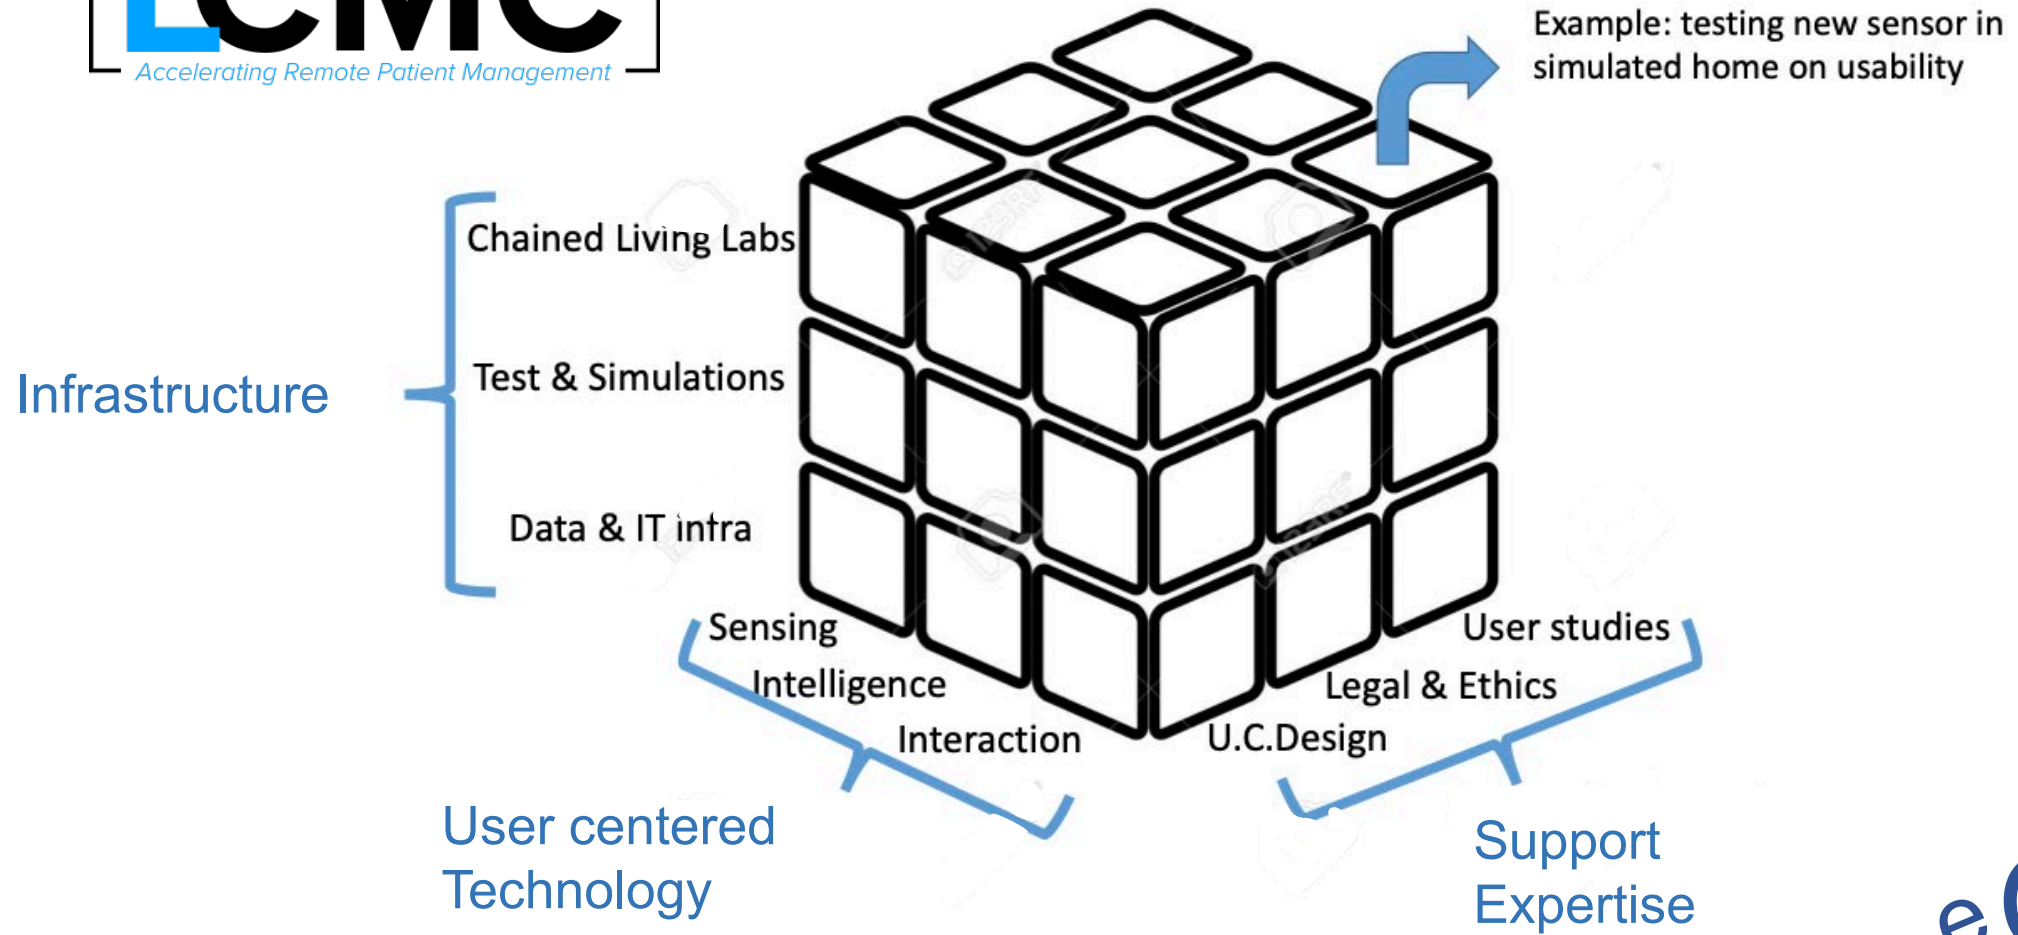

Partners

Topzorg voor uw levenskwaliteit

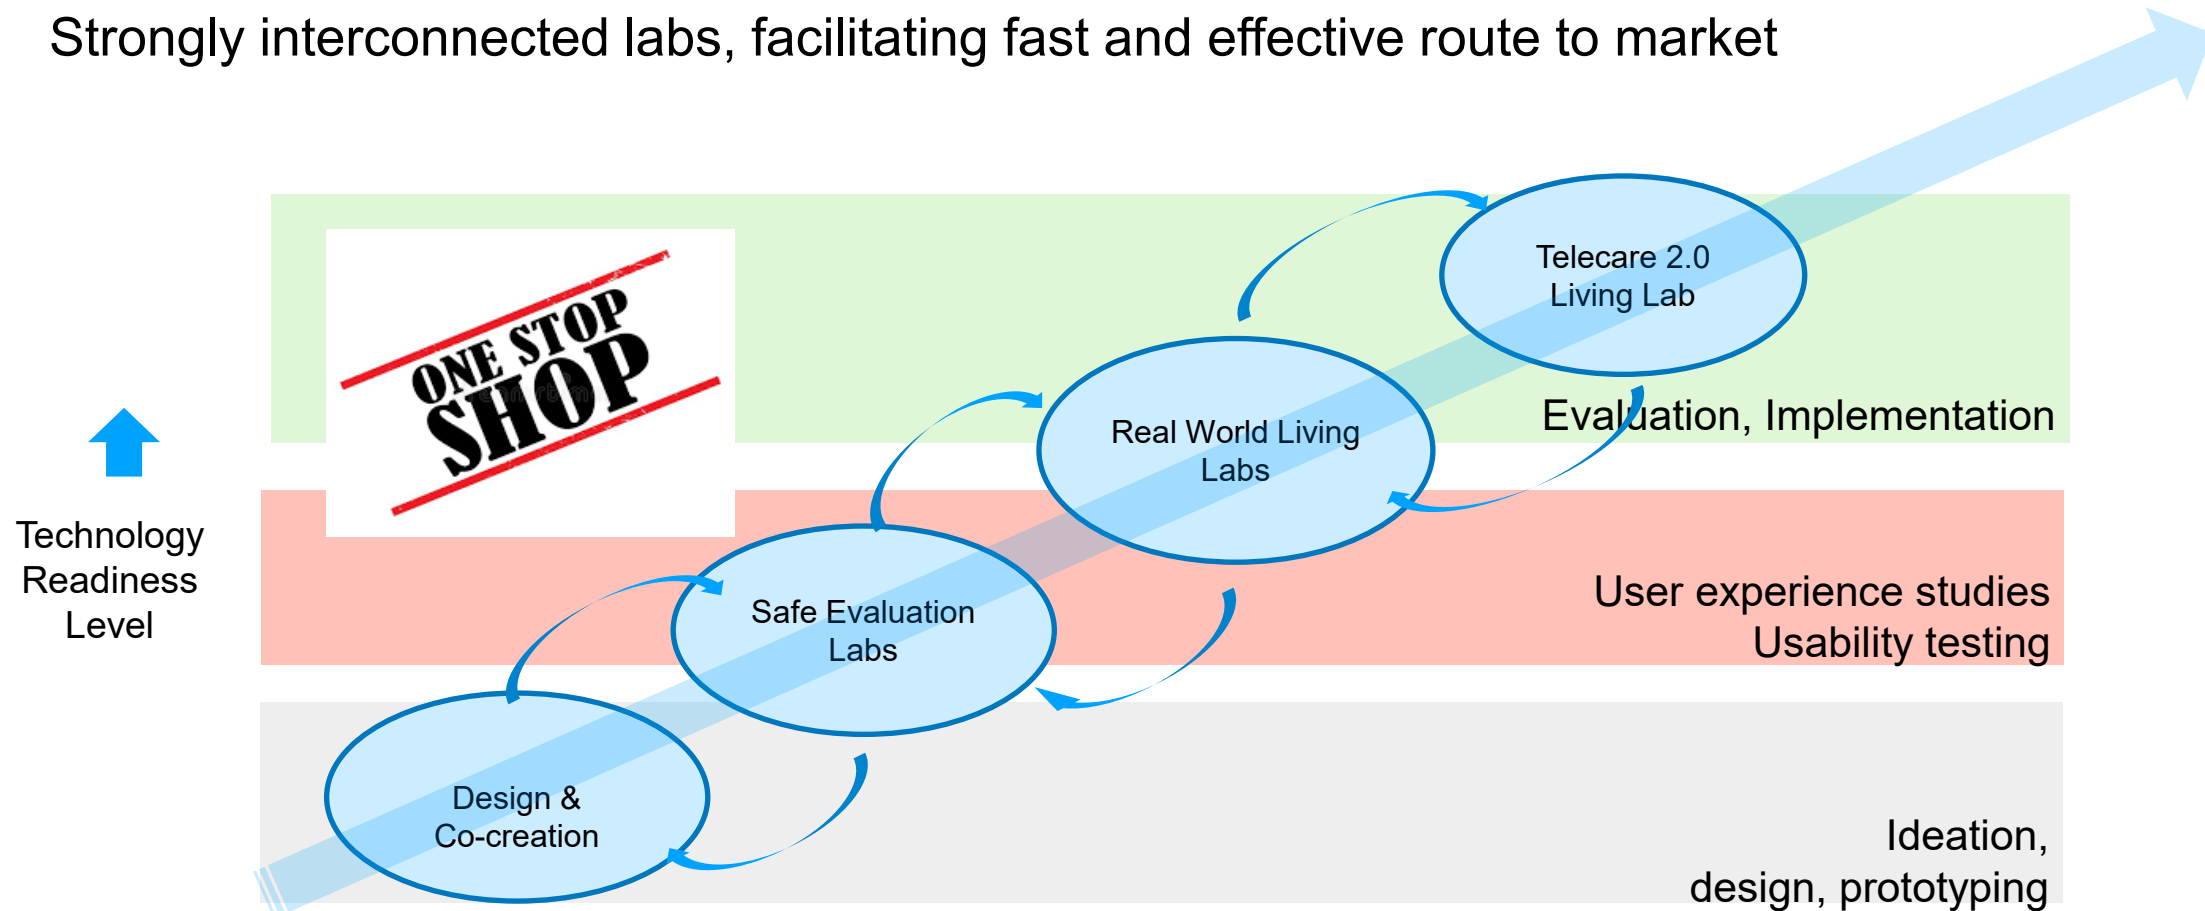

eCMC offering services

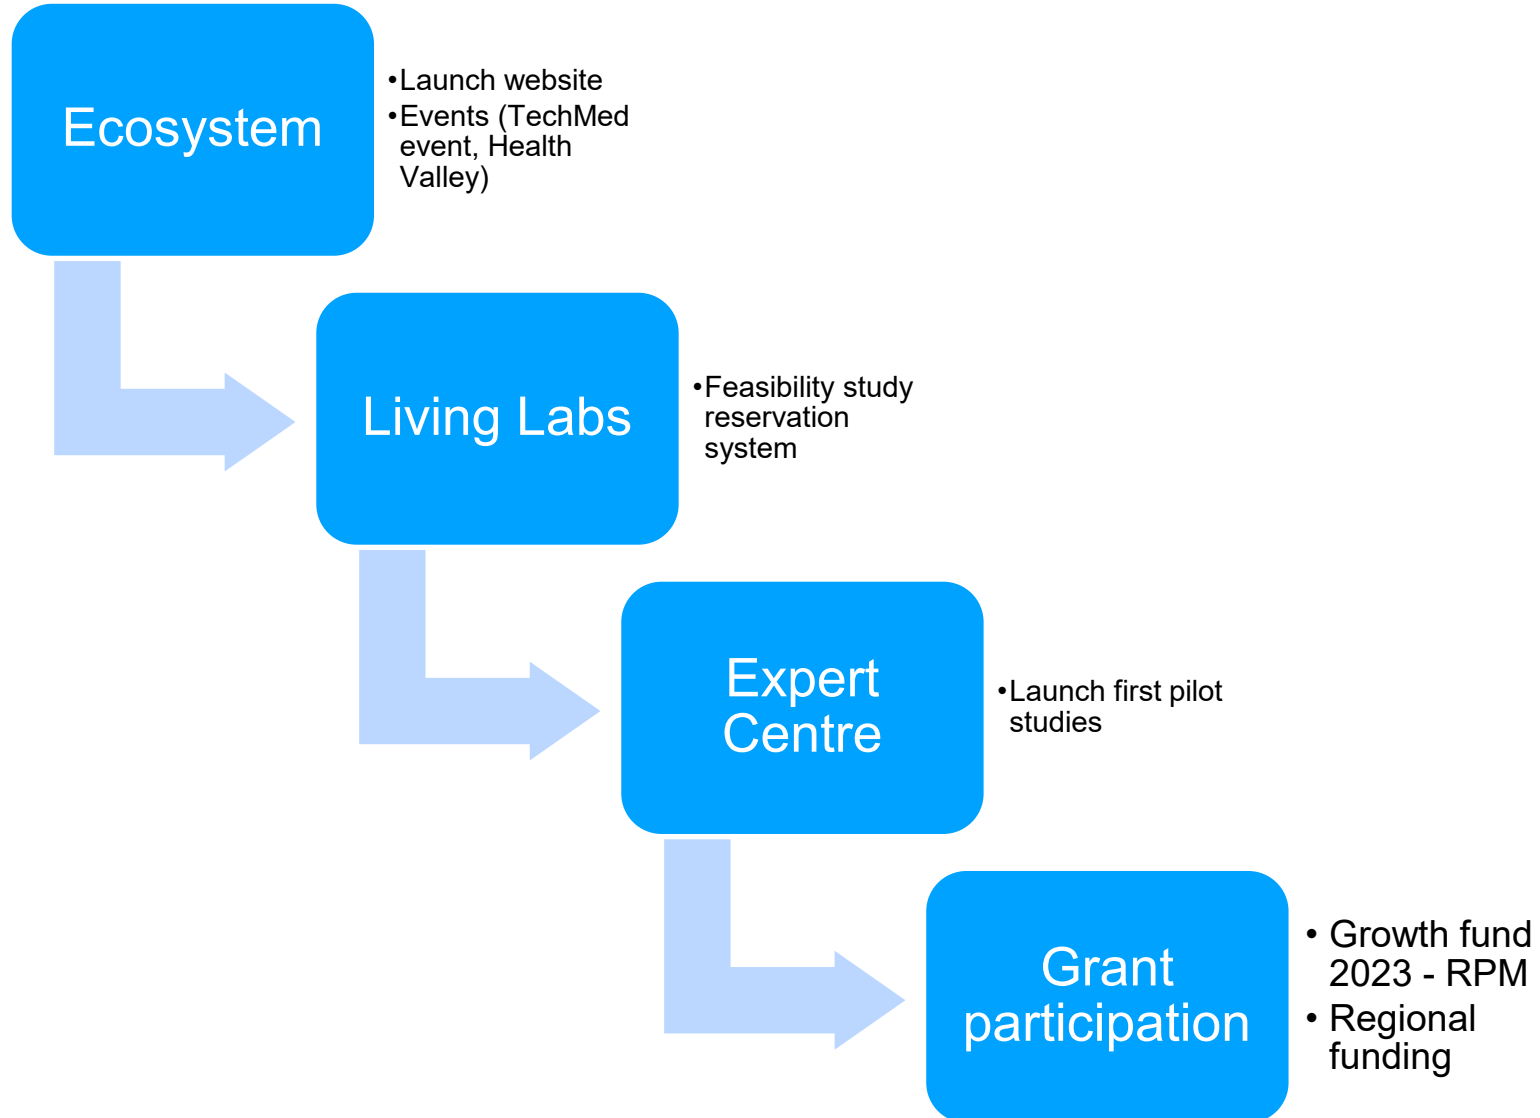

Example: testing new sensor in simulated home on usability

Living Labs ecosystem

Strongly interconnected labs, facilitating fast and effective route to market

Roadmap for development 2022-2023

With the National Growth Fund, the Dutch government is allocating €20B for projects over the next 5 years.

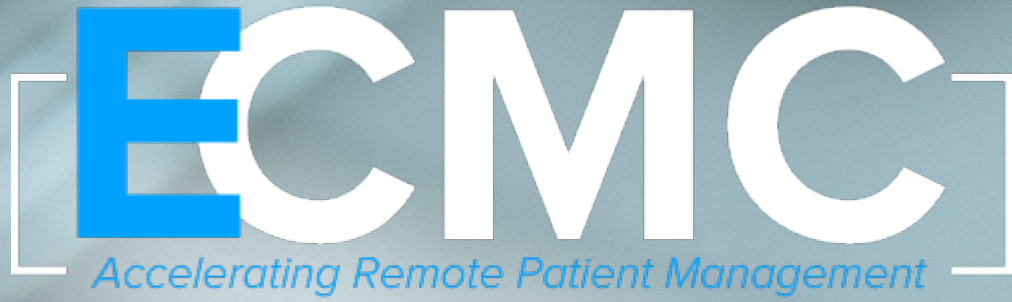

This concerns targeted investments in three areas where there are the most opportunities for structural and sustainable economic growth.

This year, together we will join forces in the region, to have a regional plan to enter a specific proposal "Edison-Remote Patient Management"

Building out the regional ecosystem for follow-up grants

- What is everyone's role in the regional ecosystem
- What do we need for a successful approach for building out the eCMC
- Who is missing/ needed?
- Who will contribute in which direction?

**Top expertise, facilities and services:
Fast and effective route to market for eHealth products**

Please join us for the network drinks of the eCMC event!
